

Earthen Hand & The I.S.L.A. Project Brings you: “Green Workshops” in Puerto Rico (USA)

Puerto Rico is known as the “Jewel of the Caribbean”
Come! Experience it!

Scott Howard: 503.328.2442

Omar Collazo: 787.501.2711

Come to participate in a series of "Green Workshops" in the beautiful Caribbean island of Puerto Rico (USA). **Scott Howard** of *Earthen Hand* (Oregon) and **Omar Collazo** of *The I.S.L.A. Project* (Puerto Rico) join forces to provide a series of workshops focused on sustainable techniques for a greener, healthier and more fulfilling life.

The workshops consist in the building of a Super-adobe house designed by Omar Collazo called the "Sun House" ("La Casa Sol") because of its shape and functionality. We will cover all details from design to finishes. The workshops will also include topics on home organic farming and other sustainable techniques based in the principles of permaculture and tropical naturalism.

We promise lots of work and excellent knowhow but also plenty of fun out in the sun.

The Green Workshops include:

- Theory /Lecture classes (with plenty of handouts) "Hablamos Español"
- Hands on practice (be prepared to get dirty and sweaty)
- Tent space. (sorry no indoor accommodation available)
- Two vegetarian meals (Brunch and Dinner + early morning Cafe/Tea, fruit and bread)
- Transportation (to and from Airport and fun trips)
- Fun Trips (beach, boat, rain forest and more)

Superadobe is the name given by Arq. Nader Khalili to the method he developed with earth bag building. This is one of the strongest and fastest methods of natural building available today.

Many applications are possible with Superadobe but the corbelled dome is the king!

Come and learn Superadobe building and much more with us!
